

AGRICULTURAL SPARE PARTS

2 Presentation of the Company

16 Blades Discs / Discs for Ploughs

30 Discs for Seeders

42 Rapid Tillage

46 Rapid Tillage / Subsoiler / Blades

52 Spring Tines and Sweep

70 Blades for the Feed Mixers

82 Ploughs Parts

COMPANY PROFILE

O.F.A.S. works in the sector of the metal and mechanical industry, that produces spare parts, specialising in those used in agricultural machinery, in construction firms and also in gardening.

The company also accepts orders for customized articles

In 1950, in a small workshop with hydraulic- power- driven machinery, the Favero family began to work with iron producing tips for chisels and picks, and blades for spades.

From a family-run workshop O.F.A.S. then became a small limited company called

“Officine Riunite Favero S.a.s”, expanding production to include gardening tools. At the end of the 1960s the company moved to its present site and developed a new range of products for agriculture and for spare parts for agricultural machinery. Since then the Company has been registered as O.F.A.S. S.p.a. (Officine Favero Attrezzi Stampati).

To meet the ever-increasing demand for its products from clients, both at home and abroad, O.F.A.S. has expanded and developed its production departments with the acquisition of the most up-to-date technological machinery. All machinery complies with current safety and environmental regulations.

Past and present mingle in order to offer a valuable, high-quality product, each step in the production of which has been carefully followed with attention, expertise and efficiency.

A well-trained staff, with the most up-to-date equipments, is always ready and willing to meet clients' demands and satisfy their requests.

O.F.A.S. S.p.a has one outstanding feature and that is flexibility, thanks to which the Company can cope with the clients' demands and solve their problems with a smile, so, thanks to the high quality of the material added to the expertise of the staff, the Company can offer a product that is not only special but also competitive on the market.

O.F.A.S. AND QUALITY

O.F.A.S. uses only raw materials coming from top class European steelworks that have been selected over the years. With today's constant technological progress, the choice of raw material for a component is never a foregone conclusion, and having the best is a must that involves the technologies of both production and design.

Boron steel in particular is used in the production of items that have to stand up to wear and tear.

The applications are many and various depending on the characteristics of the boron.

After heat treatment, in fact, boron is characterised by an elevated thermal resistance, but with a limited increase in manufacturing costs.

O.F.A.S. moreover, uses steel with a high grade of carbonium, and also Triplex steel that is commonly used in ploughs.

Boron steel is the ideal solution for a high

quality product at a relatively low cost.

O.F.A.S. applies durable coatings and facings with tungsten/cobalt linings.

These applications are micro-granular which when deposited with HVOF technology render the surface resistant to wear and tear, to corrosion and to chemical agents.

The degree of hardness that can be achieved is extremely high.

 thickness 5,0 mm
 weight 0,38 kg.

ART. 200 R 159 94 DX - ART. 200 R 159 94 SX

Toothed blade
 Type: left / right
 Square holes $\varnothing 12 \times 8$ mm
 thickness 5,0 mm
 weight 0,38 kg.

ART. 200 RDS 95

SEKO star
 Square hole 11x11 mm
 thickness 5,0 mm
 weight 0,18 kg.

ART. 200 R 205 55

Semicircular sleek blade
 Square holes 12x12 mm
 thickness 5,0 mm
 weight 0,32 kg.

BLADES FOR THE FEED MIXERS

ART. 200 RO 205 55

Semicircular sleek blade
Tearful round hole $\varnothing 12 \times 8$ mm
thickness 5,0 mm
weight 0,32 kg.

ART. 200 RD 110

Toothed blade
Square hole 11x11 mm
thickness 5,0 / 6,0 mm
weight 0,32 kg.

ART. 200 T 86/31

Sleek blade
Square hole 11x11 mm
thickness 5,0 mm
weight 0,51 kg.

ART. 200 G 190/94

Toothed blade
thickness 5,00 mm
weight 0,50 kg.

ART. 200 T 212 90 DX - ART. 200 T 212 90 SX

Toothed blade, 2 or 3 holes
Holes dimension: 18x13 mm
Type: right / left
thickness 5,0 mm
weight 0,43 kg.

ART. 200 T 160 80 DX - ART. 200 T 160 80 SX

Toothed blade
 Holes dimension: 19x12 mm
 Type: right / left
 thickness 5,0 mm
 weight 0,38 kg.

ART. 205 K 254 80

Toothed blade
 Two square holes 20x13 mm
 thickness 6,0 mm
 weight 0,50 kg.

ART. 205 K 240 74

Toothed blade
 Two square holes 20x13 mm
 thickness 6,0 mm
 weight 0,55 kg.

ART. 210 CV 10

Toothed blade for vertical systems
 3 x hole Ø 20,5 mm
 2 x hole Ø 12 mm
 thickness 6,0 mm
 weight 3,25 kg.

ART. 200 CVS 11

Toothed blade for vertical systems
 thickness 6,0 mm
 weight 3,25 kg.

BLADES FOR THE FEED MIXERS

ART. 200 CVS 15

Toothed blade for vertical systems
thickness 6,0 mm
weight 3,25 kg.

ART. 210 CV 15

Toothed blade for vertical systems
3 x hole Ø 19,5 mm
thickness 6,0 mm
weight 3,25 kg.

ART. 210 CV 25

Toothed blade for vertical systems
3 x hole Ø 18,5 mm
thickness 5,0 / 6,0 mm
weight 2,60 kg.

ART. 210 CV 50 DX - ART. 210 CV 51 SX

Toothed blade for vertical systems
thickness 6,0 mm
weight 3,25 kg.

ART. 210 CV 70

Toothed blade for vertical systems
thickness 6,0 mm
weight 3,25 kg.

ART. 200 CVK 80

Toothed blade for vertical systems
thickness 8,0 mm
weight 4,20 kg.

ART. 220 CVW

weight 1,46 kg.

ART. 220 CVM

weight 1,10 kg.

ART. 220 CVC

weight 1,35 kg.

BLADES FOR THE FEED MIXERS

ART. 220 CV DF

weight 2,00 kg.

ART. 220 CV FEL

weight 2,49 kg.

ART. 220 CV KRO

weight 2,70 kg.

ART. 220 CV CLA

weight 1,62 kg.
